
Data Science Lab. @ University of Piraeus

#2022Datathon@DataStories

Dec. 6th, 15:30-20:30 @ Univ. Piraeus central building

The Data Science Lab, University of Piraeus, is organizing a Datathon, looking for the next generation of ambitious Data Scientists! The Datathon challenge will be an effective and exciting way to generate ideas and solutions under pressure (i.e., in a short period of time) working on a challenging **time series data oriented problem related to energy consumption** using data analytics and machine learning techniques. During the challenge, you are expected to use open-source libraries and public available systems and services.

We welcome teams (up to 3 members). Single participants are also eligible to participate; nevertheless, this challenge encourages teamwork.

The Datathon will take place at the Univ. Piraeus (central building) on December 6th, 2022.

Process details

1. Register in the Datathon (one registration per team) by sending an email with subject “2022Datathon@DataStories” to ikontoulis@unipi.gr until **Monday, November 28, 2022**, including the following information: Team name; Team member #1 (name, email); Team member #2 (name, email); etc.
2. Right after the registration deadline, you will receive a reply email with additional information (use cases, etc.) in order to get prepared for the challenge.
3. Once the Datathon starts, on site you will get the final details on how to develop and submit your project.

**If you love coming up with data-driven solutions,
join our #2022Datathon@DataStories !!**
